

Your Partner for Commercial PV

Grow Your PV Business with SolarEdge

Let SolarEdge support you throughout your entire PV project life cycle. Our comprehensive tools and services will help you generate more PV sales and maintain optimal system performance from day one of operation.

Project design & pre-sale

Project design & pre-sale

Close more deals with dedicated tools and engineering services

- Training events and tools to help your sales team convey the SolarEdge added value
- Tailor-made design optimization by SolarEdge pre-sale engineers
- LCOE and ROI analysis
- Comparative PV system simulation
- Free web-based system design tool

Using the auto-string feature in the free system design software

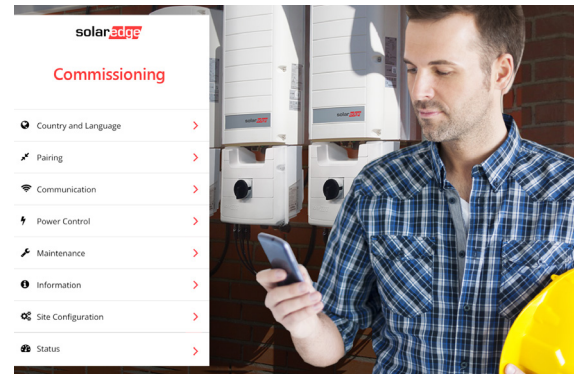

Project execution

Innovative system features:

- DC safety protecting installers from high DC voltage
- Easy and flexible string layout
- Remote site commissioning and activation
- Easy inverter activation and commissioning using the SetApp mobile application

Comprehensive project services:

- Project design validation prior to installation
- Installation validation checklist and automatic commissioning report
- Remote and on-site installation support
- Hands-on training, by SolarEdge technical experts

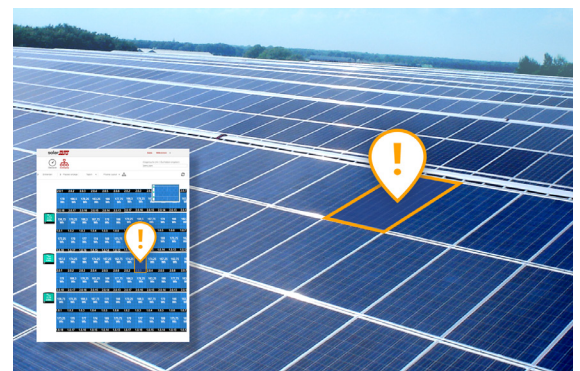

Inverter activation and commissioning direct from your smartphone

Operation & maintenance

Advanced monitoring guaranteeing increased system uptime and high performance ratio for system lifetime:

- PV fleet management
- Pinpointed automatic system alerts
- Satellite or sensor-based performance ratio
- Remote troubleshooting tools, including inverter and module-level fault detection
- Automatic site production reports
- Globally-based service teams

Pinpointed system alerts at the module level

About SolarEdge

SolarEdge is a global leader in smart energy technology. By deploying world-class engineering capabilities and a relentless focus on innovation, we create smart energy products and solutions that power our lives and drive future progress.
