

SolarEdge Designer Keyboard and Mouse Shortcuts

Version History

- Version 1.1 (March 2023) – Additional shortcuts added
- Version 1.0 (January 2019) – Initial release

Introduction

This document describes keyboard and mouse shortcuts that can be used in SolarEdge Designer. The shortcuts allow you to design and complete projects more quickly and efficiently.

Shortcuts

Shortcuts by Page

For each page in the tool navigation bar, the available shortcuts are specified below.

View	Action	Shortcut
Sites list	Open project in a new tab	Ctrl + click on a project
All views	Undo an action	Ctrl + "z" (upper or lower case)
	Redo an action	Ctrl + "y" (upper or lower case)
Site modelling 2D view	Select the drawing tool from the toolbar	Double click (anywhere on map), or Press "d" (upper or lower case)
	Insert obstacle	Press "o" (upper or lower case)
	Insert trees	Press "t" (upper or lower case)
	Increase/decrease height of a selected tree	Press ↑/↓
	Increase/decrease diameter of a selected tree	Press →/←
	Exit the draw tool and go to select tool	Right-click (anywhere on the map)
	Select multiple roof edges	Ctrl + click all edges
Site modelling 3D view	Select all connected roof edges for setting the roof height	Double-click an edge/vertex
	Increase/decrease the height of a selected roof edge	Press ↑/↓
	Increase/decrease the tilt of the selected facet of the roof by one degree	Press ↑/↓
	Flush/unflush an obstacle	Double-click the obstacle
	Select multiple roof edges	Ctrl + click all edges
PV module placement	Select and switch between facets	Double-click a facet
	Add PV modules	Press "m" (upper or lower case)
	Select specific module	Double-click a module or click a module group, then click a single module
	Activate/deactivate irradiance view	Press "i" (upper or lower case)

Electrical design	Initiate stringing operations	Press "s" (upper or lower case)
	Initiate stringing operations using the String Assistant	Press "a" (upper or lower case)
	Add modules to an existing string	Double click string + drag mouse over modules to be added
	Unselect inverters and go to select tool	Esc
	Remove modules from an existing string	Ctrl + drag mouse over assigned module

Navigation Shortcuts

In all pages where a map is used, the following shortcuts are available on the map:

Action	Shortcut
Point map north	N
Zoom in/out	+/-, or use the mouse scroll wheel
Rotate view	Ctrl + arrow keys, or click and drag the mouse scroll wheel
Pan	Alt + arrow keys, or click and drag the right mouse button
Reset viewpoint (zoom & rotation)	R

Support Contact Information

If you are having technical problems concerning SolarEdge products, please contact us:

<https://www.solaredge.com/service/support>

Before contacting SolarEdge, make sure to have the following information at hand:

- The model and serial number of the product in question.
- The error indicated on the LEDs, the SetApp mobile application, the LCD screen, or on the monitoring platform, if there is such an indication.
- System configuration information, including the type and number of modules connected and the number and length of strings.
- The method of communications with the SolarEdge server, if the site is connected.
- The product's software version as it appears in the ID status screen.
